## Geo/SQL 5.5

### Powerful GIS Management Program

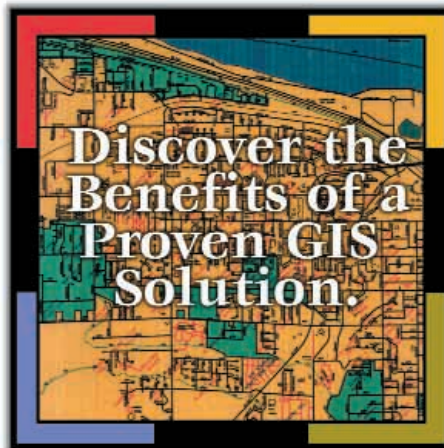

Doing business in the 21st century demands fast track decision making that requires immediate access to information. Geo/SQL 5.5 gives you the power to do this—and more!

Plotting “what if” scenarios that accurately allow you to see the big picture is quick and easy with Geo/SQL 5.5. High performance mapping and GIS (Geographic Information System) management is made easy with Geo/SQL 5.5.

“Presentation” is everything when “selling” a concept to important internal

or external clients. Geo/SQL 5.5 integrates data from different sources, analyzes it, and then produces high quality presentations in electronic or hard copy formats. It redefines the way GIS information can be used.

Geo/SQL 5.5 moves map data management, information retrieval, data indexing, location referencing and visual presentation to new levels of functionality. Geo/SQLs “one-stop-shop” package eliminates the need for add-ons. AND - Geo/SQL 5.5 is extremely affordable!

## Geo/SQL 5.5

### EASY TO USE

#### DESK/TOP TO CORPORATE

- All the power to solve complex problems
- Ideal for specialized modelling applications

#### WORKS WITH ALL MAJOR GIS DATA FORMATS

#### COMPLETE PROGRAM

- No additional modules required

#### VISUALLY APPEALING PRESENTATIONS

#### UNIQUE APPLICATIONS

- Easily adapted using Visual Basic, Delphi, Power Builder

#### AGGRESSIVE PRICING

- Low Cost
- No Additional Components Required

# GEO/SQL TECHNOLOGIES

## Geo/SQL 5.5

### Desk/top to Corporate Applications

Geo/SQL 5.5 is ideal for Desk/top or system wide enterprise GIS applications. For property and asset management, you need a GIS program that is flexible and easy-to-use. You need a management system that allows you to quickly retrieve information from a variety of data sources, then display it in a visually appealing presentation that allows instant analysis.

#### DESK/TOP APPLICATIONS

For desk/top users, Geo/SQL 5.5 works with all major GIS data formats. It has the power to capture large amounts of data and manipulate it into usable information. Geo/SQL 5.5 produces excellent visual presentations and is extremely affordable. It can be used "out-of-the-box" for desk/top or corporate applications with no additional cost.

#### ENTERPRISE WIDE APPLICATIONS

At the enterprise level, Geo/SQL not only uses these popular GIS formats, but also provides seamless spatial data using SQL database technology such as Oracle Cartridge and Geo/SQL Spatial SQL. Using Microsoft Windows as a foundation, any SQL database which supports ODBC can be used to manage the large volumes of geographic and textual data required for the most demanding applications.

The efficient modelling and integration of multi-source data is simple due to Geo/SQL's easy-to-use features. The user can even "check out" data sets on a project basis and "check them back in" while maintaining data integrity.

*Future planning, environmental assessments, proactive crises management, or ongoing operational functions like tax assessment, asset management, permit tracking, regulatory tracking and compliance, and transportation management become extremely efficient with Geo/SQL 5.5.*

#### GEO/SQL 5.5 GIS SOLUTION

##### RETRIEVES INFORMATION QUICKLY

- High Performance

##### WORKS WITH ALL MAJOR GIS DATA FORMATS

- ESRI, Mapinfo, AutoCAD, Oracle

##### INDUSTRY STANDARDS

- Runs on Microsoft Windows, ODBC

##### PRODUCES VISUALLY APPEALING DISPLAYS

- Hardcopy or Electronic

##### MAXIMIZES YOUR INVESTMENT

- Low Cost
- No Additional Components Required
